Black Diamond Video Exhibits Industry Leading Integrated OR Technology at AORN Congress 2013

Point Richmond, California, March 8, 2013 – Black Diamond Video (BDV), a leader in high resolution digital video routing and display solutions, exhibited at the 60th annual AORN Congress in San Diego to rave reviews. Inside booth 4745, Black Diamond Video held live, interactive demonstrations of its integrated operating room technology, including the Integrated Digital Surgical Suite and BDV Clarity, a web-based application.

Black Diamond Video created a streamlined, mock integrated operating room inside its booth that provided the experience of using BDV's video technology in a real OR setting. Visitors to the booth were able to operate the Integrated Digital Surgical Suite's touch panel interface to instantly route surgical

video to HD wall displays suspended around the booth, just as they could in a real OR. From this touch panel, visitors also viewed, zoomed and panned room cameras, controlled audio sources, and initiated conferences to remote locations.

AORN attendees also navigated BDV Clarity, a web-based application, from desktop and laptop computers. Recently developed by Black Diamond Video, BDV Clarity improves patient care and operating room turnover through a collection of pre-op, intra-op, and post-op tools that enhance operative visibility and communication.

“The technology developed by Black Diamond Video is resonating with our current and potential customers as evidenced by the traffic and response in our booth,” commented Michael Cibelli, Vice President of Global Medical Sales and Marketing at BDV. “It is great to see the smiles on those considering a change after hearing our capabilities and those who have already purchased our technology and are overwhelmingly satisfied.”

As Black Diamond Video’s customer base and product line continue to grow, the company looks forward to an even stronger presence at next year’s AORN Congress to be held March 30 through April 1, 2014 in Chicago.

About Black Diamond Video

Black Diamond Video is a leading manufacturer and integrator of high-resolution, digital video processing solutions for mission-critical medical, military and commercial applications. The company manufactures a complete product line of single-link and dual-link DVI matrix switches, processors, scalars, signal conditioners, converters, system controllers, digital recorders, and H.264 streaming and conferencing technology. Black Diamond Video also provides custom software design services for medical applications.
