Harbor-UCLA Medical Center Awards Black Diamond Video Contract for OR Video Integration

Point Richmond, California, June 17, 2013 – Black Diamond Video (BDV) announced that Harbor-UCLA Medical Center selected Black Diamond Video to provide operating room audio video integration for their new Surgery/Emergency Replacement Project.

Black Diamond Video will install the Integrated Digital Surgical Suite (IDSS), an all-digital, high resolution video routing and display solution, in 16 operating rooms and one pathology lab at Harbor-UCLA Medical Center. The Integrated Digital Surgical Suites will deliver user-friendly, high-resolution video routing, audio routing, multi-windowing, camera control, and video conferencing capabilities to Harbor-UCLA's surgical, nursing and clinical engineering teams.

"Our Integrated Digital Surgical Suites will enhance visualization, collaboration and education within Harbor-UCLA Medical Center," commented Edward Priest, Founder and CEO of Black Diamond Video. "The IDSS enables clinicians using microscopes, endoscopes, and all other imaging devices to view this video in great detail on high definition displays inside the OR. During a procedure, surgical video and audio can be streamed in real time to a pathology lab for immediate consultation or to a classroom of medical students for teaching applications."

Black Diamond Video's Integrated Digital Surgical Suites are slated to go live at Harbor-UCLA Medical Center in the first quarter of 2014.

About Black Diamond Video

Black Diamond Video is a leading manufacturer and integrator of high-resolution digital video processing solutions for mission-critical medical, military and commercial applications. The company manufactures a complete product line of single-link and dual-link DVI matrix switches, processors, scalars, signal conditioners, converters, system controllers, digital recorders, and H.264 streaming and conferencing technology.
