Black Diamond Video Receives ISO 9001 and ISO 13485 Certifications

Point Richmond, California, December 30, 2013 – Black Diamond Video (BDV) today announced it earned ISO 9001:2008 and ISO 13485:2003 certifications.

After extensive company-wide operations audits at its headquarters in Point Richmond, CA, Black Diamond Video completed the final stages of certification for both ISO standards. These independent audits determined that BDV's quality management system consistently meets customer and regulatory requirements in compliance with the globally recognized standards set by the International Organization for Standardization (ISO).

"Becoming certified for these ISO standards is an important milestone for BDV," commented Edward Priest, Founder and CEO of Black Diamond Video. "Black Diamond Video is dedicated to providing the highest quality digital video technology and we could not do so without company-wide allegiance to the internal processes and standards that support this goal. Being acknowledged for this effort is rewarding for our entire team and assures our growing customer base that BDV is committed to providing superior products and services."

Black Diamond Video engineers industry-leading digital video processors, matrix switches, proprietary software and more, and pairs these products with premier customer service and support. With the achievement of ISO 9001:2008 and ISO 13485:2003 certifications, Black Diamond Video expects its current and future customers will enjoy heightened confidence in the company.

"Black Diamond Video's ISO 9001:2008 and ISO 13485:2003 certifications support what we have already demonstrated to our loyal customers and partners," continued Edward Priest. "These certifications are proof-positive that BDV is dedicated to operational excellence and customer satisfaction. Our customers and partners can feel secure in the Black Diamond Video brand and the industry-leading products, services and support we provide."

About Black Diamond Video, Inc.

Black Diamond Video is a leading manufacturer of high-resolution digital video processing solutions for mission-critical medical, federal, commercial and educational applications. The company manufactures a complete product line of single-link and dual-link DVI matrix switches, processors, scalars, signal conditioners, fiber optic transmitters and receivers, converters, system controllers, digital recorders, H.264 streaming and conferencing technology, and custom software solutions.
